

nfant[®] Thrive Feeding System

Take the guesswork out of feeding™

Feeding challenges—from milk production and latching to bottle aversion—are common and stressful. Objective, evidence-based support offers definitive guidance for parents to overcome these difficulties and ensure their newborn can thrive.

At nfant, we combine innovative biofeedback technology with your trusted clinical expertise to improve feeding outcomes across all settings—from hospital to home. Our Connected Feeding™ platform can help professionals:

- Predict, prevent and overcome feeding aversions
- Improve clinical outcomes and ease the concerns of parents
- Understand infant feeding skill development
- Measure milk flow at the breast
- Support feeding assessments with objective data

nfant[®] Thrive Breast

A first-of-its-kind health and wellness wearable to non-invasively track milk flow

- Accurately assess volume and timing of milk flow at the breast
- Encourage breastfeeding confidence
- Promote breastfeeding continuation
- Anchor lactation recommendations with data

nfant[®] Thrive Bottle

FDA cleared to measure movement of the tongue during nutritive and non-nutritive sucking

- Non-invasively determine oral skill level, strength and coordination
- Gauge effectiveness of interventions in real time and longitudinally
- Leverage nfant[®] Control Flow Nipples to provide the most consistent and reliable flow rates for breast milk, formula and thickeners

Partnering with You to Advance Infant Feeding Care

nfant has collaborated with researchers, speech-language pathologists, physicians, and clinicians for more than a decade to advance the science of effective infant feeding. If you are interested in learning more about our latest clinical studies, or how Thrive's quantitative data can support your practice, we would be happy to walk you through our products and answer any questions you may have. Email us at pros@nfant.com to connect. You may also scan the QR code to start helping families today!
